

MOUNTING INSTRUCTIONS: PICTURE LEDGE

Contents

36," 48" or 60" wall shelf
2½" long screws/anchors

Tools needed

Phillips screwdriver
stud finder (optional)

Directions

1. Remove wall mount strip (A) from ledge by removing the 1¼" screws that attach the two 'layers.' Locate wall studs, then hold wall mount strip (A) in level position at desired height and drive 2½" screws through the pre-drilled holes into wall studs. Make sure the screws hit the wood or metal studs. If they do not hit the studs, use wall anchors provided.
2. Once the wall mount strip (A) is secured to wall, place ledge (B) with fascia under wall mount strip (A) and secure with the 1¼" screws removed in step one.
