

Securing Your Floor Mirror

- 1 Place the mirror at your desired location against the wall. With a pencil, make a mark on the wall at the center of the top of the mirror.
- 2 Move the mirror away so you can see the pencil mark. Measure down 2 inches from the pencil mark and install the provided wall anchor.
- 3 Attach one end of the cable to the wall anchor with a screw.
- 4 Reposition the mirror in your desired location.
- 5 Attach the cable to the top of the mirror with the screw provided.

Please note: The cable is only for securing your mirror as it leans. It is NOT SAFE for hanging or suspending your mirror.
