

assembly instructions: hale bed

List of parts

- 1 – headboard
- 1 – footboard
- 2 – bed rails
- 4 – bed posts
- 2 – canopy end rails
- 2 – canopy side rails
- 8 – metal cam connectors
- 1 – 6mm hex end wrench
- 8 – connector bolts
- 10 – steel support slats (Full)
- 12 – steel support slats (Queen/King/Cal King)

Tools needed

Phillips screwdriver

note

Wood naturally expands and contracts causing bed connections to loosen over time. Tighten hardware occasionally to restore the bed to its original stability.

Directions

1. Using a Phillips screwdriver, attach connector bolts to threaded inserts in bed posts (Figure 1).
2. Connect headboard and bed rail to each headboard bed post by aligning dowels, headboard and bed rail into holes in bed post. Insert bed post connector bolts through each hole in the ends of the headboard and bed rail and engage into metal cams on back side of headboard and bed rail (Figure 2).
3. Repeat step 2 for footboard and footboard bed posts.
4. Turn each metal cam clockwise ½ turn with hex end wrench to tighten connection (Figure 3).
5. Place slats on side rails, matching the slots in each slat to the rivet on the side rails.
6. Place mattress on slats.
