GROMMET DRAPERY MEASURE INSTRUCTIONS

SELECT SINGLE PANEL OR PAIR
Single Panel:
• One individual panel
• Choose from left panel, center panel or right panel

Pair of Drapery:
• Two equal panels (1 left, 1 right)

When ordering a pair, the total coverage width you specify will be automatically divided in two (for two equal panels) totalling the overall specified coverage width.

SELECT TOTAL WIDTH COVERAGE
• Measure the width of the area you would like to cover. This is your ordering width – fullness is already accounted for (approx. 1.8x fullness).
If your drapery needs to open and close, the total coverage width will equal the same span left to right that your hardware will be.

Tips:
• We recommend whenever possible to extend out from the edges of your windows or doors as much as 6”–12” on each side. This will help make the area look larger, and will also allow as much natural light as possible when the drapery is open.
• If ordering drapery that does not need to close (stationary panels), ordering a drapery with less coverage will still give a finished, professional look.

SELECT FINISHED LENGTH
• Measure the desired length of your drapery. Keep in mind the hardware type you will be using and where it will be mounted (see hardware deduction chart). The finished length you supply us with is the exact measurement the drapery fabric will be made

<table>
<thead>
<tr>
<th>Drapery Hardware</th>
<th>Top of Pole (Wall Mount) to Top of Fabric</th>
<th>Deduction from Ceiling (Using Ceiling Mount Brackets) to Top of Fabric</th>
</tr>
</thead>
<tbody>
<tr>
<td>Decorative Rod – 1 3/16” Diameter</td>
<td>add 1”</td>
<td>1”</td>
</tr>
</tbody>
</table>

TIPS
• Choose a finished length that is long enough so that the drapery may be installed as high above the window/door as you are comfortable with. This will give you a more dramatic look and help enhance your ceiling height.
• Consider a small “break” on your drapery. An additional length of 1”–3” often enhances the finished look. It’s also a great way to disguise uneven floors. Simply add the desired break amount into your finished measurement.
• For drapery that will be opened and closed frequently, we recommend ordering a length that will keep the drapery approximately ½” off the floor.
• Please bear in mind that we use some of the finest materials available to create your custom draperies. As with all fabrics made of natural fibers, there may be slight changes due to a number of variables, including but not limited to: humidity, temperature and moisture. This is to be considered normal. If this is a concern, consider ordering a length that includes a small break.

SELECT LINING OPTION
“Lining” refers to a fabric that is sewn to the back of the drapery to protect it from the sun, improve insulation, add body, and provide privacy by reducing the amount of light that travels through the drapery. All linings are an off-white fabric.

Unlined
• No lining added to your drapery
• Preserves the natural sheerness of the material
• Not recommended when using silk fabric that will be exposed to direct sunlight
• No charge

Privacy Lining
• Offers privacy and provides greater light control
• Protects fabric and improves insulation
• Adds additional body and weight
• Additional cost

Blackout Lining
• Blocks 99% of light for complete privacy and great insulation
• Recommended for bedrooms, media rooms or wherever light blockage is desired
• Additional cost

Privacy Lining + Interlining
• Cotton flannel lining hangs between the material you selected and the privacy lining
• Gives drapery extra body and holds its shape
• Offers privacy and maximum insulation
• Additional cost

ADDITIONAL INFORMATION
• Inside diameter of grommet = 1 1/16”
• Outside diameter of grommet = 2 3/8”
• 1 1/2” side hems, 4” top and bottom hems
• 4 3/4” returns from center of grommet
• Approximately 1.8x fullness
