

LESLIE HARDWIRE WALL SCONCE

CAUTION:

- It is strongly recommended that installation of this product is done by a professional.
- READ these safety instructions entirely prior to installation.
- DO NOT BEGIN INSTALLATION UNTIL ALL ELECTRICAL POWER TO THE INSTALLATION SITE HAS BEEN TURNED OFF AT THE CIRCUIT BREAKER!

RECOMMENDED TOOLS AND MATERIALS:

Phillips screwdriver
Wire strippers

Level
Electrical tape

Wire cutters
Flat blade screwdriver

THIS PRODUCT INCLUDES:

(not to scale)

- A. - Leslie sconce base
- B. - Shade
- C. - Crossbar assembly
- D. - LED light bulb

- E. - Wire nut (X2)
- F. - Mounting Screws (X2)
- G. - Shade mounting screws

NOTE: This sconce is designed for hardwire mounting to an existing wall sconce junction box. If you do not have an existing junction box have one installed by a licensed professional.

1

Remove the threaded thumb screw from the crossbar assembly and use the provided mounting screws to mount the crossbar assembly to the junction box at the installation site. The crossbar can be mounted at any angle.

2

Use the included wire nuts to twist together the white and black wires from the wall sconce to their corresponding wires in the junction box. If a green ground wire is present, it can be attached directly to the crossbar with one of the mounting screws.

3

Center the sconce over the junction box and crossbar, ensuring all wires are tucked in and not pinched. Use the previously removed threaded thumb screw to fasten the unit to the crossbar through the hole in the front of the sconce.

4

Unscrew the threaded ring at the bottom of the socket to allow the pull chain guide to slide down and off the socket.

5

Feed the pull chain and pull chain guide down through the center of the washer on the shade while lifting the shade up into place. Orient the shade so the seam faces the wall before using the three included shade mounting screws to fasten the shade in place.

6

Return the pull chain guide to its original position on the socket before screwing the threaded ring onto the socket to hold the pull chain guide in place. The pull chain guide should be oriented so that the pull chain hangs as close to the wall as possible.

SPECIAL CONSIDERATIONS:

If you prefer to use a different light bulb than the LED bulb included, any standard T10 shape, E26 socket light bulb (max 25 watts) can be used instead.

Note: Non-LED bulbs may produce more heat, and increase the risk of discoloration, melting and fire.

Purchase replacement bulbs at roomandboard.com.
